Peanut Belt Research Station Lewiston-Woodville, N.C.

The Peanut Belt Research Station focuses on North Carolina's peanut crop. Extensive research is under way at the station with emphasis on peanut breeding, soil fertility, tillage, pesticide interactions and ecology, and management of weeds, insects and diseases.

All facets of peanut production are studied, from planting to curing. Other research at the 371-acre station involves corn, cotton, soybeans, sorghum, small grains and certain vegetables.

The College of Agriculture and Life Sciences

The College of Agriculture and Life Sciences educates students through its Office of Academic Programs, seeks new knowledge through its research division, the North Carolina Agricultural Research Service, and extends educational programs throughout the state through the North Carolina Cooperative Extension Service.

Our strong relationships with our many partners enhance the quality and productivity of our research, teaching and extension programs. We extend our appreciation to all our field day partners and participants.
